

Senior PHP Developer

Job Location: Mumbai/Bangalore

Experience: 3-4 years

We are building a disruptive technology platform powered by ideas for a new model of development to deliver lasting freedom and prosperity for all Indians. We are looking for senior developers who love to be challenged and push boundaries using cutting edge technologies to bring our ideas to life. Our culture is open, progressive, entrepreneurial and mission-driven. We value collaboration, agility and innovation.

Essential Duties and Responsibilities

1. Understand business requirements and translate them into technical requirements
2. Work in an agile environment of engineers to architect, design, develop and build our server side infrastructure
3. Manage a team and ensure code quality, integration, timeliness and performance
4. Design and implement APIs in support of front-end services with a highly scalable, flexible, and secure backend using the LAMP stack
5. Managing the interchange of data between the server and the client application
6. Design and implementation of low-latency, high-availability, responsive, and performant applications with high quality
7. Develop and maintain high performance, reusable, and reliable code
8. Hands on experience and ready to work on Post production, bug fixes, support. Identify and correct bottlenecks and fix bugs

Skills and Characteristics

1. Strong knowledge of Core PHP, MySQL, Ajax, JQuery etc.
2. Strong knowledge of API and web-service (REST, SOAP) design, coding and implementation
3. Memcache, Redis, Solr/Lucene/Elastic Search, Varnish, MongoDB or any NoSQL DB
4. Proficient in the use of SVN/GIT, best practices and continuous integration
5. Strong knowledge of OOPs
6. A knack for benchmarking and optimization
7. Performance engineering, AWS, Cloud Computing, Linux Internals, Apache/Nginx server configuration
8. Professional approach to time, cost, colleagues and deadlines
9. Ability to learn new technologies quickly
10. Easy-going and flexible individual who can integrate and function within a pre-existing team
11. Self-starter who can operate with minimal direction
